

The smell is absolutely gone.

Also we thought, sure nice stories, whatever…. Well indeed. We ordered a combination package on Sunday, Tuesday delivery and we went stain hunting around 22.30 with the light, a recent one was perfectly visible, the oldest (approx. 4 months) no longer, but we knew it was there (carpeting with foam back glued to the concrete) so we went to work with the UF2000, covered with a garbage bag, and repeated for 5 times. We should really spray another 2 times, but the smell meeting you at the door the moment you came in is absolutely gone. We will re-order another 1 litre just to be sure.

You never know with 4 cats is the house.
